

Who we are

Predator IT are a cyber security consulting service. We are passionate about what we do, and we are good at it!!

Our unique team of associate consultants all have a minimum of 10years experience, many have much more, and all hold at least one relevant certification in the cyber security or data management environment.

We are led by Mark J Ward, CISM who has over 30years cyber security experience across many sectors in both public and private organisations, and is considered one of the leading Consulting CISOs in the UK.

Our consulting portfolio is set out below, however, if you have other consulting requirements, please contact us to discuss your needs at info@predatorit.com

Cyber health check – is your business cyber ready? Our health check will determine where and what needs focus to increase your cyber readiness, making recommendations where appropriate.

Supplier check – are your key suppliers cyber safe? It's important where suppliers have access to or manage your data, that you ensure they are cyber ready too. The General Data Protection Regulation or GDPR requires you to ensure they are.

Cyber framework consulting – do your clients require a level of certification for cyber security from you as a business such as ISO27000 or Cyber Essentials (CE)? We can conduct a gap analysis to determine the time and cost of becoming compliant to any major cyber framework or legislation.

Policy provision - the writing and successful implementation of an Information Security Policy, or indeed any company security policy, is probably the single most effective and efficient measure a company can take to reduce the risk of security breaches.

Bid response or review – we are able to consult on the preparation of bids you may be engaged in or review bids you have requested, providing security questions for your suppliers to answer and reviewing and scoring their responses.

Major incident management – our consultants have advised and managed major cyber incidents for both national and international clients. From managing the incident itself to recovery and 'uplift' programs to prevent reoccurrence.

Staff training and awareness – bespoke training and awareness sessions to meet your needs.

Investigative resource – several of our consultants have military or police backgrounds and are trained in investigative processes and can aid in or advise on the investigative process whether you choose to engage with law enforcement or not.
